

OPS NETWORK IMAGE SIZE REQUIREMENT GUIDE

There are several areas within the OPS Network where minimal image size requirements must be met for the network to accept the images. Many of these requirements are in place to ensure that small images are not uploaded to areas that require larger files, causing them to become blurry when expanded.

When uploading an image file to any of the below listed tools in OPS, the network will alert the user if the file is too small and provide the required dimensions to be met.

Below you will find the minimum image size requirements for various applications within the OPS Network. All image dimensions are provided in pixels.

COMMUNITY INTERFACE IMAGES:

MAIN AGENCY LOGO/INSIGNIA:	300 X 300 pixels (Square Canvass with a Transparent Background - .png file)
